That means that the number you see will express how much money you'll have if you win the bet, including your original wager. For instance, if you bet \$1 at 3.00 odds, winning will mean you now have \$3 – your original dollar, and the \$2 you've won. The rules are a piece of cake. Just spin the reels and wait for the winning combination to come. You win, when a winning combination appears within a pay line. All wins occur on adjacent reels and are paid according to the payable. Your total win consists of the win in coins multiplied by the total bet. You cannot influence the former, but you can change the latter. Just use controls on the dashboard and select the number of coins and the bet multiplier for that purpose. Moreover, you can continue playing all day long thanks to Autospin option. You can also break the bank with the help of Max Bet button. Winstar payouts

Sticky wilds keep their place for a number of spins, giving you a chance to win more frequently. A subtype of sticky wild is the shifting wild, which travels horizontally across the reels during every spin, and eventually disappears. Finally, stacked wilds fill up the whole reel by popping up one on top of the other. That's it at the moment. However, one should be aware that not all of these options are available at online casinos that accept Klarna. It will be logical to conclude that no one will let you make a bet when you do not actually have the necessary sum of money on your bank account or give you a credit to pay for your online deposit later when you see whether you win or not. Consequently, only "Pay now" option is available for the online punters who prefer to play at casinos that take Klarna.
