So what are the reasons for playing high roller slot machines? First of all, these slots have the higher payout. That's obvious — when you make a higher bet, you win more money, the luck permits. The high limit slots odds are usually higher than those of regular slot machines as the casino owners are trying to make the best use of small bet slots that are played more frequently and that's why increase the house edge for them. As slots with high limit are played not so often but are very lucrative for the casino, their RTP is higher and the high limit slot wins can happen relatively more often. Microgaming has loaded European Roulette Gold with a large number of optional Expert functions comprising Red Splits, Black Splits and Zero Game. This variant stands out among classic Roulette games because it includes two bets that are not normally found in standard versions. A player may place a Neighbor bet – a straight up bet on a number on the roulette wheel, together with its two adjacent numbers ("neighbors"). The Call bet involves covering several numbers on the roulette wheel. Another function of the Expert mode comes to the forefront here, as players use it to choose the numbers which are to be covered. Numbers must be neighboring and the maximum is 9. The Re-bet option allows players to place the same bet amount again in the next round, conveniently without the hassle of re-purchasing chips. Upper limits on the various bets run from \$15 for a Straight to \$70 for a Dozen bet. The two additional bets and the multi functional Expert mode add some extra pizzazz to this version of Roulette. The added features make this game more exciting and enjoyable. It is an excellent choice for every player who wants a large selection of betting options and personal control of the game's speed, sound and graphic quality.
