The simplest way to debunk the idea of a roulette wheel having a memory is to think of the odds behind a coin flip. Each time a coin is flipped there is a fifty percent chance of either side of the coin landing face up. If a coin flip produces one result ten times in a row, that result still has a fifty percent chance of appearing on each flip in the future. The same is true for the numbered slots on a spinning wheel – the game has no memory and cannot alter its motion to produce or avoid a specific outcome. Both French and European roulette varieties have 37 pockets (with only a 0 pocket), while American varieties have 38 pockets (with both a 0 and 00 pocket). As it is obvious from the name, 5 reel slots have 5 vertical rows of game symbols that spin and create winning combinations. The number of these combinations is the first thing that make 5 reel slots stand out as the increased number of reels make it possible to have more possible paylines and thus make these slots more lucrative. The increased number of reels also means that there can be more game symbols and more advanced features can be used. While in classic slots we only had wild and scatter symbols (and sometimes we didn't have any special symbols at all), free slot games with 5 reels made it possible to create different variations of wild symbols such as stacked or shifting wilds and also use more bonus rounds and mini-games. Another hallmark of 5 reel games is how they look. Modern technologies give more space for graphic and sound effects and that's why most of the 5 reel games are video slots or 3D slots. While the classic 3 reel games are usually so-called "fruit slots" where the only game symbols are fruits and lucky 7's, the 5 reel slots have more variety in themes. While playing free 5 reel slots online, you can travel to the Ancient Egypt or Asia, meet wild animals or walk around the creepy haunted house with just a few clicks. Animated symbols and various bonus games make video slots look more like full-fledged video games. They are cool to play when you are an experienced gambler but might be a little bit complicated if it's your first time playing casino games. So if you are a newbie, you'd better start with simple 5 reel games with no more than 20 paylines and then slowly move to more sophisticated games with advanced features and bonuses.
