Really, it makes no difference if you are playing online roulette in an Australian online casino or any other. The roulette instructions are the same. You start by selecting how much you wish to bet. When playing in an online casino such as the All Slots Casino, there is no pressure to bet more or less. You bet what you feel comfortable betting. In roulette, once you decide on how much you want to bet, you have a great many options what to bet on. The roulette table is divided into thirty-six numbered squares. You can place your bet on any number of squares. A single bet can cover a single square or you can place your bet on a large group of numbers such as all the odd or all the even numbers. Then, after your bet has been placed, you can click on the button that controls the ball. A ball is sent spinning round a wheel that is encircled by numbered slots. When the wheel slows down, the ball drops into one of the numbered slots. If the slot shares the same number as a square which is covered by one of your bets, you win. The amount you win depends on the odds of your bet. That's all the roulette instructions you need to know whether you want to play on the All Slots Online Casino or at any Australian online casino. As a rule, several slot games are linked together to make up one huge progressive jackpot that would become higher more quickly. This works perfectly well because of a little tricky nuance: the more players are playing the same progressive slot machine online, the more contributors to the jackpot there will be.
