Blackjack is the best online card game when you take into account the house edge. Players who search for the best odds are likely to find twenty-one to be their top bet. Video poker, baccarat, and craps each offer good odds for the type of games they are. If you consider video poker a card game instead of a gaming machine, you might find a better payback percentage from the full pay version of these games. Full pay machines are incredibly hard to find, especially in an online setting, so blackjack is the best casino game you can play on the Internet, even if you expand the

definition of a card game. Below, I'll discuss why. Play Fruit Salad Jackpot gaming slot created by GamesOS casino software provider and enjoy the benefits it offers. It is classic slot that consists of 3 reels and 1 row of symbols typical of old good casino games. Apart from cute theme, there are high payouts and enjoyable music for you not to get bored. Perhaps the best way to start is by learning the probability of the hand dealt, combined with the probability of busting when drawing on that hand. Being dealt a 2-16 is the most likely combination, and those are generally considered hands where you have to make a decision on whether to hit or stand. Anything over 16 should be an automatic stand, regardless of what the dealer is showing. Deciding whether to hit or stand is then based upon what the dealer is showing, with the understanding that a 5 or a 6 holds the biggest % chance of him busting, and the % dropping rapidly on either side of the 5 and 6.
