These are one of the first online casino games that became popular among gamblers all over the world. Classic slots have only 3 vertical rows that, obviously, limits them in the number of possible winning combination but doesn't limit the amount of money you can win when you play them for real money bets. Of course, these number of reels didn't allow to use many advanced features but 3 reels slot games where the first where wild and scatter symbols (now familiar to every gambler) were used. Free slot machine games with 3 reels are the best option for the players who are just starting to play gambling games. Video slots with many reels usually have some advanced features that might be hard to understand from the first glance and the newbie in the gambling world can easily get confused. So it's a nice way to get acquainted with slot games while playing classic slots and then move on to more complicated five or seven reel games. Talking about symbols and their features, the player should know the following. To the Wild Symbols the Letter A symbol (under the name of the game, the Alpha Squad symbol) belongs, which transforms itself and can substitute any symbol that is needed for a winning payline. The Wild Symbol loses its features when the reel is spinning. The Scatter Symbols are the ones that can help to win when two or more such symbols appear anywhere on the screen. Such wins are multiplied by total bet staked and added to payline wins. 3 or more Alpha Squad Base Scatter symbols, that appear anywhere on the reels, bring to pass the free spins round. The free spins and multiplier round are launched once your hero is chosen. The hero will attack any symbol and change it into the Wild Symbol after the reel stops. The free spins cannot be activated more than once during the feature. All wins are paid left to right, except the Scatter and Free Spins wins that can be paid any way. All payline wins are multiplied by credits bet per line. Scatters and bonuses are paid additionally. Only the highest win per active payline is paid. The amount of the potential gain depends directly on the number of similar symbols. The more similar symbols you have – the higher is your gain. Besides, each symbol has its own value.
